The Center for Transportation and the Environment (CTE) conducts research, education, and technology transfer that seek to mitigate the impacts of surface transportation on the environment. CTE is a national university transportation center, funded in part by the U.S. Department of Transportation and the North Carolina Department of Transportation. CTE is located in the offices of the Institute for Transportation Research and Education on North Carolina State University's Centennial Campus. The center reports to NCSU's Vice Chancellor for Research and Graduate Studies. CTE is recognized nationally (and in many circles, internationally) for its decade-long contributions to advancing the state of the science, developing the next-generation workforce, and encouraging creative inter-agency and stakeholder collaborations that yield constructive solutions to transportation and environmental problems.

Carter & Burgess is a nationwide company with offices in 31 locations across the country. The firm includes specialists in public involvement, community impact assessment, impact assessment for low income and minority populations, land use and social impacts. We have worked on community impact assessments in 23 different states. Our clients include DOTs, federal agencies, transit properties, cities and counties. Our staff includes trainers in Community Impact Assessment techniques.

Through the years, as PBS&J has grown from a prominent Florida-based corporation to a firm of national standing, one of the things that has remained constant is our commitment to the communities in which we live and work. From Tampa to Beltsville and from Encinitas to Birmingham, PBS&J's team is energized by the role we play in improving the quality of life no matter where we call "home." This passion for service is a hallmark of PBS&J's corporate culture, and it is a continuous thread that both connects PBS&J team members with the community and weaves the fabric of our organization.

Challenged to personally invest in our communities by our corporate mission statement, PBS&J team members can be found coaching little league teams and mentoring high school students. You'll find us alongside you at river and roadside cleanups and working with the disabled. No matter where you find a PBS&J office, our team members will be hard at work in the community, giving back and being enriched by the experience.

J.F. Sato and Associates, Inc. (JFSA) is an environmental and engineering firm providing planning, design, and construction management for a wide range of infrastructure projects. Founded in 1979, the firm has established a solid track record of high quality service and performance in the areas of transportation engineering, water resources, environmental planning, GIS, construction management, and surveys. JFSA also specializes in civil engineering for site development, structural engineering for new and existing buildings, facilities, and support structures.
